

MICRON WH303A/X

PLATINUM 300 SERIES - TRIPLE WHOLE HOUSE FILTRATION SYSTEM

General Information

The WH303A/X Platinum 300 Series delivers advanced whole house filtration, purifying water down to 5 micron*. Featuring premium coconut shell Granular Activated Carbon (GAC) combined with industry-leading KDF 55 media, it provides powerful reduction of sediment, chlorine, disinfection by-products (THMs), pesticides, herbicides, and a wide spectrum of heavy metals.

Engineered with a high-capacity ion exchange resin filter, the system not only enhances water clarity, taste, and odour, but also offers superior protection for appliances and tapware while minimising scale build-up on surfaces such as shower screens. Enclosed in a robust 316 stainless steel cover, it is purpose-built to withstand Australia's harsh outdoor conditions. The result is fresher, better-tasting water throughout your home, along with softer hair, smoother skin, and an overall improvement in wellbeing.

Designed for mains water supply.

Features and Benefits

- Connection design ensures 100% of water flows through the filter media, allowing for maximum contact time and more effective contaminant reduction
- Standard 4.5" x 20" housings provide double the capacity of 4.5" x 10" housings
- Greater contact time, flow rates, longevity, and chemical removal
- Suitable for small to large homes with 2 or more bathrooms
- 5 micron PP Sediment Pre-Filter for removal of fine particles, sand, and rust
- High Capacity Water Softening Resin Filter for reducing water hardness
- Granular Activated Carbon (GAC) & KDF 55 Heavy Metal Reduction Filter for removal of chlorine, THMs, water-soluble heavy metals, VOCs, pesticides, and herbicides, improving taste and odour
- Bacteriostatic, high-capacity control of scale, bacteria, and algae within filter
- UV resistant marine grade 316 stainless steel brackets and external cover
- 1/4" top mount pressure gauge ports and bleed valve

Cartridge Replacement and Timeframe Suggestions

WH20-5SED 5 micron PP Sediment Filter cartridge to be replaced every 3 - 6 months.

WH20-RES+ High Capacity Water Softening Resin Filter cartridge to be replaced every 3 - 6 months.

WH20-GAC KDF 55 Granular Activated Carbon & KDF 55 Heavy Metal Reduction Filter cartridge to be replaced every 6 - 12 months.

PLATINUM 300 SERIES - TRIPLE WHOLE HOUSE FILTRATION SYSTEM

Measurements in millimetres

Platinum 300 Series Specifications

Model	Platinum 300 Series - Triple Whole House Filtration System
Product Description	Platinum 300 Series - Triple Whole House Filtration System 1st stage: 5 micron PP Sediment Pre-Filter (Model: WH20-5SED) 2nd stage: High Capacity Water Softening Resin Filter (Model: WH20-RES+) 3rd stage: GAC+ KDF 55 Heavy Metal Reduction Filter (Model: WH20-GAC KDF 55)
Filtration Capacity	Removes dirt, sand, silt, rust and fine particles to nominal size. Reduces chlorine, VOCs, chemicals, heavy metals, and scale, to soften water and improve odour and taste. Bacteriostatic properties prevent the growth of bacteria and algae within KDF 55 cartridge
Flow Rate	35L/min
Micron Rating	5 micron*
Min/Max Pressure	200-1600 kPa (with PLV)
Min/Max Temperature	4 - 42°C (must not freeze / cold water only)
Connection	Standard Port Size 1" - Brass Thread
External Cover	316 Marine Grade Stainless Steel Mounting Frame and Cover
Cartridge Size	4.5" x 20"
Compatible Filter Cartridges	WH20 Filter Series
Dimensions	With Cover: 762 mm (H) x 604 mm (L) x 210 mm (W)
Certification	WaterMark
Warranty	3 Years^

^ 3 year warranty covering parts only, excluding cartridges. Use only genuine Micron Water Filters cartridges. Filter replacement timeframes are guidelines only and may vary with water quality and usage.

* Micron rating is nominal.
