

Harmony Sanitaryware – Ambulant Compliant Toilet Suites

Definitions

Ambulant toilets are specifically designed for those with ambulant disabilities that do not require the extra space that is provided by Accessible toilets. Primarily, they are for those that do not require the use of a wheelchair, for example, those with sensory loss, arthritis or require the use of a walking frame.

Accessible toilets are specifically designed to provide enough space to accommodate wheelchair access and assistance when transferring from wheelchair to toilet. Accessible toilets include features such as lower mirrors and washbasins, contrasting toilet seat colour, grab rails and braille signage.

Minimum Requirements AS1428.1 (2009)

Height of Pan – 460 to 480mm (Measured from finished floor level to top of seat)

Projection – 610 to 660mm (Measured from the rear to the front of the pan)
